# Illnesses and Injuries Reported in California<sup>1</sup> Associated With<sup>2</sup> Pesticide Exposure Summarized by the Type of Activity and Type of Exposure 2002

Occupational<sup>3</sup>

	Type of Exposure <sup>5</sup>									
Type of Activity <sup>4</sup>	Drift	Residue	Direct Spray/ Squirt	Spill/ Other Direct	Ingestion		Other	Unknown	Total	
Mixer/Loader	10	0	5	48	0	0	3	3	69	
Applicator	45	1	22	54	0	4	5	37	168	
Mechanical	1	0	3	1	0	0	0	0	5	
Packaging/Processing	104	9	0	0	0	24	0	0	137	
Field Worker	160	78	0	0	0	0	0	2	240	
Routine Indoor	17	28	2	4	0	2	6	4	63	
Routine Outdoor	26	0	2	0	0	0	1	2	31	
Manufacturing/Formulation	0	0	0	4	0	0	0	1	5	
Transport/Storage/Disposal	0	0	0	10	0	1	7	1	19	
Emergency Response	0	1	0	0	0	0	4	0	5	
Other	7	12	1	7	1	0	21	2	51	
Total Occupational Cases	370	129	35	128	1	31	47	52	793	

Non-Occupational<sup>3</sup>

	Type of Exposure <sup>5</sup>									
Type of Activity <sup>4</sup>	Drift	Residue	Direct Spray/ Squirt	Spill/ Other Direct	Ingestion	Multiple	Other	Unknown	Total	
Mixer/Loader	6	0	0	9	1	1	3	0	20	
Applicator	47	0	12	15	0	2	4	11	91	
Routine Indoor	116	35	3	2	15	3	5	18	197	
Routine Outdoor	92	5	2	1	6	1	36	2	145	
Transport/Storage/Disposal	0	0	0	0	0	0	1	0	1	
Other	17	0	2	8	29	4	3	5	68	
Unknown	0	0	0	0	0	0	1	0	1	
Total Non-Occupational Cases	278	40	19	35	51	11	53	36	523	
Total Occupational/ Non- Occupational	648	169	54	163	52	42	100	88	1316	

<sup>&</sup>lt;sup>1</sup> **Source:** California Department of Pesticide Regulation, Pesticide Illness Surveillance Program.

Definite : High degree of correlation between pattern of exposure and resulting symptomatology. Requires both medical evidence (such as measured cholinesterase inhibition, positive allergy tests, characteristic signs observed by medical professional) and physical evidence of

exposure (environmental and/or biological samples, exposure history) to support the conclusions.

Probable : Relatively high degree of correlation exists between the pattern of exposure and the resulting symptomatology. Either medical or physical

evidence is inconclusive or unavailable.

<sup>&</sup>lt;sup>2</sup> Associated With: Includes cases classified as definitely, probably or possibly related to pesticide exposure

Possible : Some degree of correlation evident. Medical and physical evidence are inconclusive or unavailable.

## <sup>3</sup> Occupational Status: Occupational or Non-Occupational

Occupational : Work related. The individual was on the job at the time of the incident. This includes both paid employees and volunteers

working in similar capacity to paid employees.

Non-Occupational : Not work related. The individual was not on the job at the time of the incident. This category includes individuals on the way

to or from work (before the start or after the end of their workday).

### <sup>4</sup> **Type of Activity:** Activity of the injured individual at the time of exposure

Mixer/Loader : Mixes and/or loads pesticides. This includes: (1) removing a pesticide from its original container, (2) transferring the

pesticide to a mixing or holding tank, (3) mixing pesticides prior to application, (4) driving a nurse rig, or (5) transferring

the pesticide from a mix/holding tank or nurse rig to an application tank.

Applicator : Applies pesticides by any method or conducts activities considered ancillary to the application (e.g., cleans spray nozzles in

the field).

Flagger : Flags for an aerial application, either fixed-winged or helicopter.

Mechanical : Maintains (e.g. cleans, repairs or conducts maintenance) pesticide contaminated equipment used to mix, load or apply

pesticides as well as the protective equipment used by individuals involved in such activities. This excludes the following:

1) maintenance performed by applicators on their equipment incidental to the application; 2) maintenance performed by

mixer/loaders on their equipment incidental to mixing and loading; 3) decontamination by HAZMAT teams.

Packaging/Processing : Handles (packs, processes or retails agricultural commodities from the packing house to the final market place. Field

packing of agricultural commodities is classified as FIELD WORKER.

Field Worker : Works in an agricultural field performing tasks such as advising, scouting, harvesting, thinning, irrigating, driving tractor

(except as part of an application), field packing, conducting cultural work in a greenhouse, etc. Researchers performing

similar tasks in an agricultural field are also included.

Routine Indoor : Conducts activities in an indoor environment with minimal expectation for exposure to pesticides. This includes people in

offices and businesses, residential structures, etc. who are not handling pesticides.

Routine Outdoor : Conducts activities in an outdoor environment with minimal expectation for exposure to pesticides. This excludes field

workers in agricultural fields. This includes gardeners who are not handling pesticides.

Manufacturing and : Manufactures, processes or packages pestic Formulation

: Manufactures, processes or packages pesticides. This includes "mixing" if it is done in a plant for application elsewhere.

Transport/ : Transports or stores pesticides between packaging and preparation for use. This includes shipping, warehousing and retailing as well as storage by the end-user prior to preparation for use. Disposal of unused pesticides is also included in this activity. This excludes driving a nurse rig to an application site.

Emergency Response : Emergency Response Personnel (Police, fire, ambulance and HAZMAT personnel) responding to a fire, spill, accident or

any other pesticide incident in the line of duty.

Other : Activity is not adequately described by any other activity category. This includes but is not limited to: 1) being inside a

vehicle; 2) dog groomers not handling pesticides; 3) individuals handling pesticide treated wood; 4) two or more activities

with potential for pesticide exposure.

Unknown : Activity is not known

<sup>5</sup> **Type of Exposure:** Characterization of how an individual came in contact with a pesticide.

Drift : Spray, mist, fumes, or odor carried from the target site by air. Drift must be related to an application or mix/load activity.

Residue : The part of a pesticide that remains in the environment for a period of time following an application or drift. This includes

odor after the completion of an application.

Direct Spray/Squirt : Material propelled by the application or mix/load equipment. Contact with the material can be by direct projection or ricochet.

This includes exposure of mechanics working on application or mix/load equipment when the material is forced out by

pressure.

Spill/Other Direct : Any of the following: 1) Contact made during an application or mixing/loading operation where the material is not propelled

by the equipment; 2) Expected direct contact during use (e.g. washing dishes in a disinfectant solution); 3) Leaks, spills, etc.

not related to an application.

Ingestion : Intentional or unintentional oral ingestion.

Multiple : Contact with pesticides occurred through two or more mechanisms.

Other : Other known route of exposure not included in other exposure categories. This includes, but not limited to: 1) Residue from a

spill and 2) Exposure to smoke or pyrolitic products from a fire where pesticides are burning.

Unknown : Route of exposure is not known.

Physical address: 1001 I St., Sacramento CA 95814-2828. Mailing address: P.O. Box 4015, Sacramento, CA 95812-4015

Fax: (916) 445-4280 www.cdpr.ca.gov

#### **About the Pesticide Illness Surveillance Program Data**

Pesticide-related illnesses have been tracked within the state of California for more than 50 years. The California Environmental Protection Agency, Department of Pesticide Regulation (DPR) maintains a surveillance program which records human health effects of pesticide exposure. The Pesticide Illness Surveillance Program (PISP) documents information on adverse effects from pesticide products, whether elicited by the active ingredients, inert ingredients, impurities, or breakdown products. This program maintains a database, which is utilized for evaluating the circumstances of pesticide exposures resulting in illness. This database is consulted regularly by staff who evaluate(s) the effectiveness of the DPR pesticide safety programs and recommend changes when appropriate.
